

SUPPORT FOR BRAIN HEALTH AND MENTAL CLARITY†

## Benefits†

- Helps support the generation of cellular energy
- Supports mental energy and focus
- Helps promote healthy moods
- Helps protect the brain and nervous system
- Helps support the health of brain cells affected by occasional stress
- Encourages proper neurotransmitter production

## Highlights

- This product is composed of a component of our natural brain's chemistry and promotes production of acetylcholine, the most abundant neurotransmitter in the brain.†
- It may support energy production within brain cells, aiding in mental clarity, focus, and stamina.
- This product is a form of L-carnitine, an amino acid derivative that helps the body produce energy. However, slightly altering the chemical structure of this nutrient (adding the "acetyl" group), helps it work differently in the body to support both brain health and energy production.†
- Energized brain cells communicate better with each other and with the rest of the body, leading to a healthy mood.†

## Recommended Use

As a dietary supplement, take one capsule per day, or as directed by your health care practitioner.

Consult with your health-care practitioner about your specific circumstances and any questions you may have about this product.
